

com.carrental.service.UserService.registerUser

com.carrental.service.UserService.updateUser

com.carrental.models.User.set  
isAdmin

```
graph LR; A[com.carrental.service.UserService.registerUser] --> C[com.carrental.models.User.set isAdmin]; B[com.carrental.service.UserService.updateUser] --> C;
```

The diagram illustrates a dependency or mapping between two service methods and a single model method. On the left, two white rectangular boxes with black borders contain the service method names: 'com.carrental.service.UserService.registerUser' (top) and 'com.carrental.service.UserService.updateUser' (bottom). On the right, a gray rectangular box with a black border contains the model method name: 'com.carrental.models.User.set isAdmin'. Two blue arrows originate from the right side of the top white box and the right side of the bottom white box, both pointing towards the left side of the gray box, indicating that both service methods interact with or depend on the model's 'set isAdmin' method.
