

com.carrental.controller.
AdminControllerTest.testShowAdmin
Dashboard_WithAdminUser_ReturnsAdminDashboard

com.carrental.controller.
AdminControllerTest.testShowAdmin
Dashboard_WithNonAdminUser_RedirectsTo
AccessDenied

com.carrental.controller.
AdminController.showAdminDashboard

```
graph LR; A["com.carrental.controller.  
AdminControllerTest.testShowAdmin  
Dashboard_WithAdminUser_ReturnsAdminDashboard"] --> C["com.carrental.controller.  
AdminController.showAdminDashboard"]; B["com.carrental.controller.  
AdminControllerTest.testShowAdmin  
Dashboard_WithNonAdminUser_RedirectsTo  
AccessDenied"] --> C;
```

The diagram illustrates a mapping from two test methods to a single controller method. Two light blue boxes on the left represent test methods: 'com.carrental.controller.AdminControllerTest.testShowAdminDashboard_WithAdminUser_ReturnsAdminDashboard' and 'com.carrental.controller.AdminControllerTest.testShowAdminDashboard_WithNonAdminUser_RedirectsToAccessDenied'. Two blue arrows point from these boxes to a single dark gray box on the right, 'com.carrental.controller.AdminController.showAdminDashboard', indicating that both tests target the same controller action.
